---------------	---

- This API is not supported for this application type -
Api=Sleep. Module=api-ms-win-core-synch-l1-2-0.dll.
File=TitaniumWindows.dll.
- **Impact if not fixed:** Using an API that is not part of the Windows SDK for Windows Phone Store apps violates the Windows Phone Store certification requirements.
- **How to fix:** Review the error messages to identify the API that is not part of the Windows SDK for Windows Phone Store app. Please note, C++ apps that are built in a debug configuration will fail this test even if they only use APIs from the Windows SDK for Windows Phone Store apps.
